

Cyclematic Cyclone

The Cyclematic 'Cyclone' brings you the latest in electric bike technology. Based on a mountain bike concept, it utilises front fork suspension to smooth the bumps and disc front brake combined with rear hub brakes. Shimano 7 speed gears with positive "trigger" gear change are a standard feature.

Cyclomatic Cyclone

ELECTRIC BIKE

Cyclomatic Cyclone. All-alloy frame, front disc brakes, 26"x1.75" dual wall alloy wheels, drink bottle, reflectors, mud flaps, front & rear lights

The powerful lithium battery can be released in seconds. It is locked in place with a quality key to avoid unauthorised removal. The battery can be removed for charging or charged while on the bicycle.

Pedal Assist (PAS). In this mode, a sensor "picks up" rotation of the pedals being pushed and calls on the motor to assist the cyclist. The power comes on smoothly and if the cyclist keeps pedaling (even gently), the power will keep on driving the bicycle to its top speed. If the cyclist stops pedaling the power is stopped and the bicycle will "coast".

Twist Power mode uses a twist throttle - like on a motorcycle, no pedaling is required at all. All the Cyclomatic bikes come with **both** Pedal Assist and Twist power modes.

The "Cyclone" has quick adjust seat so it can be adjusted for different riders in seconds. It can also disassemble easily for efficient storage or transport in a car or wagon by fast release wheels.

Features

- 26" X 1.75" tyres and dual wall alloy rims.
- Full alloy frame (light and durable).
- 200 watt DC power.
- 7 speed Shimano quality gears.
- 24V lithium battery (for longer trips and more recharge cycles).
- Suspension front forks (better handling and comfort).
- Powerful front disc brakes.
- Rear integral hub brakes.
- Power indicator.
- Bell.
- CE / Australian compliant rapid charger.
- Rear carry rack (optional).
- Quick flip seat for fast battery removal.
- Key lock for security.
- Weight 26kg plus battery.
- Maximum load 110kg.

Soft ergonomically designed seat, pedal reflectors, rear tail light.

Headlight, Shimano gears, bell, powerful front and rear brakes.

The Cyclone is available in black, white, red and silver.

All the Cyclomatic bicycles come with electric LED head lights and tail lights and standard reflectors for maximum visibility if you get caught out late.

The "Cyclone" model is suitable for any rider who wants the flexibility of mountain bike performance with the ability to get to work or school, with zero effort, i.e. no sweat! If you want some exercise, just switch off the power and pedal home (sweat all you want)!

The "Cyclone" has a similar range to the other Cyclomatic models; approximately 40km (PAS).

The Cyclomatic "Cyclone" is the perfect vehicle to get to work, or the shops, or go visiting friends. It is also fitted with front and rear electric LED lights for those late trips home. No sweat and environmentally fantastic!

If you are an inner city commuter in peak hour, your Cyclomatic trip will take a fraction of the time of a car trip. Consider all of the benefits along with the cost savings of: **no parking fees, no public transport fees, no petrol, no parking fines...**

And only a few cents to charge the battery!

All of the Cyclomatic models are made using the highest quality materials and workmanship incorporating the latest technology. They are certified to international quality standards and are CE certified.

The Cyclomatic range of electric bicycles are manufactured by a world leader in electric vehicles; including electric cars, resort vehicles, mobility vehicles and other electric driven products.

These vehicles are widely distributed in Europe, U.S.A. and other international markets. The production environment, attention to design and quality control are second to none.

When choosing a Cyclomatic electric vehicle, you can be assured of the highest quality and performance available.

Save \$\$\$. Save the environment.
